FOUNDATION TIER**

2nd SPECIMEN PAPER SUMMER 2017

1 HOUR 30 MINUTES

ADDITIONAL MATERIALS

The use of a calculator is not permitted in this examination.
A ruler, protractor and a pair of compasses may be required.

INSTRUCTIONS TO CANDIDATES

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer **all** the questions in the spaces provided in this booklet.

Take π as 3.14.

INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.

Unless stated, diagrams are not drawn to scale.

Scale drawing solutions will not be acceptable where you are asked to calculate.

The number of marks is given in brackets at the end of each question or part-question.

The assessment will take into account the quality of your linguistic and mathematical organisation, communication and accuracy in writing in question **8**.

For Examiner's use only		
Question	Maximum Mark	Mark Awarded
1.	6	
2.	3	
3.	2	
4.	2	
5.	2	
6.	5	
7.	5	
8.	7	
9.	5	
10.	3	
11.	4	
12.	4	
13.	5	
14.	7	
15.	5	
TOTAL	65	

Formula list

Area of a trapezium = $\frac{1}{2}(a+b)h$

1. (a) Write the number 6 342 000 in words. [1]

.....
.....

(b) Write the number fifty–three thousand and six in figures. [1]

.....

(c) What is the sum of 647 and 285? [1]

.....
.....
.....

(d) Write down the multiple of 8 which lies between 50 and 60. [1]

.....

(e) Write down all the factors of 21. [2]

.....

2. (a) Measure and write down the length of the line AB .
Clearly state the units you are using.

[2]

Length of AB =

- (b) In the space below, draw a circle with diameter 8 cm.

[1]

3. Using each of the numbers 6, 7, 8 and 9 once only, fill in the blanks to make each statement correct. [2]

(a) $\square \times \square - 5 = 43$

(b) $36 \div \square + \square = 11$

.....
.....
.....
.....

4. (a) Jonny travelled from Holyhead to Swansea.
Circle the answer which shows the best metric unit to measure the distance he has travelled. [1]

centimetre mile metre kilometre millimetre

- (b) Rosie wanted to cook leek soup for St David's Day.
She needed to buy 3 kg of leeks for her recipe.
Circle the answer which gives the best approximation in pounds (lbs) for that weight of leeks. [1]

6 lb 3.3 lb $\frac{1}{3}$ lb 30 lb 6.6 lb

.....
.....
.....

5. Ifan has a bag with red and green balls in it.
There are 40 red balls and 60 green balls.
Ifan chooses one ball at random from his bag.

On the probability scale below, mark the points A and B where:

A is the probability that Ifan chooses a green ball,

B is the probability that Ifan chooses a yellow ball.

[2]

6. Lucy recorded the number of times some football teams in the Welsh Alliance League won a match during a season. The teams were Bethesda Athletic (B), Caernarfon Town (C), Llanberis (L) and Nefyn United (N).

The data she collected is shown below.

B B N C C C L C N L B C C C C L B B C N N C B

(a) Complete the following table using the above data. [2]

Football team	Tally	Frequency
Bethesda Athletic (B)	 	
Caernarfon Town (C)		
Llanberis (L)		
Nefyn United (N)		

(b) Draw a suitable graph to show this data on the grid below. [3]

7. (a) Work out 3% of £800. [2]

.....
.....
.....
.....

(b) Work out $\frac{2}{5}$ of 450. [2]

.....
.....
.....
.....

(c) Simplify $16h - 18h + 9h$. [1]

.....

8. You will be assessed on the quality of your organisation, communication and accuracy in writing in this question.

Hussein has a set of scales.
He has some weights which are labelled A, B and C.
Hussein places different weights on his scales three times so that they balance each time.
Find the values of A, B and C.

[5 + OCW 2]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

A =kg B =kg C =kg

9. (a) Find the size of angle x .

[2]

Diagram not drawn to scale

.....

.....

.....

$x = \text{.....}^\circ$

(b) ABC is an isosceles triangle with $AB = AC$ and $\hat{BAC} = 34^\circ$.
 BCD is a straight line.
Find the size of \hat{ACD} .

[3]

Diagram not drawn to scale

.....

.....

.....

.....

$\hat{ACD} = \text{.....}^\circ$

10. Circle the correct answer for each of the following statements.

(a) 0.2 is equivalent to

2%

20%

0.2%

$\frac{1}{5}\%$

$\frac{2}{10}\%$

[1]

(b) $5.4 - 2.16$ is equal to

2.24

3.24

3.34

3.36

7.56

[1]

(c) $\frac{5}{6} - \frac{1}{3}$ is equal to

$\frac{51}{63}$

$\frac{4}{3}$

$\frac{1}{2}$

$\frac{4}{6}$

0.43

[1]

11. Sian states,

'When a fair coin is tossed and a fair dice is thrown,
the probability of getting a head and an even number is $\frac{1}{2}$.'

Is Sian correct?

You must show enough working to justify your answer.

[4]

.....

.....

.....

.....

.....

.....

.....

.....

12. (a) A rectangle, R , has sides of 5 m and 3 m.

Draw a sketch of a different rectangle that has the same perimeter as rectangle R .
Write down the length of each of the four sides of your rectangle.

[2]

(b) Both the length and width of rectangle R are exactly doubled.
Does this mean that the area is also exactly doubled?
You must show enough working to justify your answer.

[2]

.....

.....

.....

.....

.....

.....

.....

.....

13. Solve each of the following equations.

(a) $\frac{x}{4} = 8$

[1]

.....
.....
.....
.....

(b) $\frac{7}{x} = 14$

[1]

.....
.....

(c) $9x + 4 = 2x + 39$

[3]

.....
.....
.....
.....

14. (a) The median value of three numbers is 6.
 The three numbers are x , 6 and y , in ascending order.
 Both the range and the mean of these three numbers are also 6.

Find the value of x and the value of y . [2]

.....

$x = \dots\dots\dots$ $y = \dots\dots\dots$

- (b) (i) Find the mode of the following set of numbers, and show that the range, median and mean of the numbers are all the same as the mode.

7 11 6 4 7 [3]

.....

Range

Mode

Median

Mean

- (ii) Each of the five numbers is increased by 1.
 Circle either TRUE or FALSE for each of the following statements.

[2]

The range is increased by 1.	TRUE	FALSE
The mode is increased by 1.	TRUE	FALSE
The median is increased by 1.	TRUE	FALSE
The mean is increased by 1.	TRUE	FALSE

15. A right-angled triangle ADE is attached to a trapezium $ABCD$ as shown below.

Diagram not drawn to scale

$AD = 4\text{ cm}$, $BC = 6\text{ cm}$, and the perpendicular height of the trapezium is 3 cm .
The triangle and the trapezium have equal area.

Calculate the length of AE .

[5]

.....

.....

Range

Mode

Median

Mean

- (ii) Each of the five numbers is increased by 1.
 Circle either TRUE or FALSE for each of the following statements.

[2]

The range is increased by 1.	TRUE	FALSE
The mode is increased by 1.	TRUE	FALSE
The median is increased by 1.	TRUE	FALSE
The mean is increased by 1.	TRUE	FALSE

9. At lunchtime on any given day, Alun has one of the following drinks: coffee, tea, mineral water or fruit juice. His choice of drink each day is independent of his choice of drink on any other day. The table below shows the probabilities for three of his choices of drink on any randomly chosen day.

Drink	Coffee	Tea	Mineral Water	Fruit Juice
Probability	0.5	0.18	0.27	

- (a) Calculate the probability that, on any randomly chosen day, Alun has a fruit juice at lunchtime. [2]

.....

.....

.....

- (b) What is the probability that, on any randomly chosen day, he has either tea or mineral water at lunchtime? [2]

.....

.....

- (c) What is the probability that, in any randomly chosen week, Alun has coffee on the Tuesday and has tea on the Friday? [2]

.....

.....

10. (a) The table below shows some of the values of $y = 3x^2 - 4x - 10$ for values of x from -2 to 3 .

Complete the table by finding the value of y for $x = 2$.

[1]

x	-2	-1	0	1	2	3
$y = 3x^2 - 4x - 10$	10	-3	-10	-11		5

.....

- (b) On the graph paper opposite, draw the graph of $y = 3x^2 - 4x - 10$ for values of x from -2 to 3 .

[2]

- (c) Using your graph, write down the values of x when $y = 0$.
 Give your answers correct to 1 decimal place.

[1]

Values are and

- (d) Give the coordinates of the point on your curve at which the y -values stop decreasing and begin to increase.
 Write each coordinate correct to 1 decimal place.

[2]

$x =$ $y =$

- (e) If you needed to draw the graph of $y = 3x^2 - 4x - 10$ for values of x from -3 to 4 using the same size of graph paper, what would you need to alter on the graph?

[1]

.....

For use with question 10.

11. Are the following statements true or false? Circle the correct answer.
You must give a **full explanation** of your decision in each case.

(a) $a^2 + b^2$ is always an even number when a and b are whole numbers.

[1]

true / false

.....
.....
.....
.....

(b) $a^2 b^2$ is always an odd number when a and b are odd numbers.

[2]

true / false

.....
.....
.....
.....

13. Circle the correct answer for each of the following statements.

(a) The gradient of the line $2y = 4x + 3$ is

$\frac{1}{2}$

$\frac{3}{2}$

$\frac{2}{3}$

$\frac{3}{4}$

2

[1]

(b) The line $3y = 5x - 6$ crosses the y -axis at

$y = -2$

$y = -\frac{1}{2}$

$y = 2$

$y = \frac{5}{3}$

$y = \frac{1}{2}$

[1]

(c) The line $y = 3x - 2$ has a point with coordinates

$(3, -2)$

$(0, 2)$

$(-3, 2)$

$(2, 3)$

$(3, 7)$

[1]

14. Find, in standard form, the value of

(a) $\frac{2.7 \times 10^{10}}{6000}$,

[2]

.....
.....
.....
.....

(b) $(4.5 \times 10^{-2}) \times (3 \times 10^{-3})$.

[2]

.....
.....
.....
.....

15. For a particular visitor to Gwynedd, taking a trip up Snowdon is independent of visiting Caernarfon Castle.
The probability that the visitor takes a trip up Snowdon **and** visits Caernarfon Castle is 0.12.

(a) Complete the following tree diagram.

[4]

.....
.....

- (b) Calculate the probability that the visitor does not go up Snowdon and does not visit Caernarfon Castle.

[2]

.....
.....
.....
.....

16. (a) Solve the equation $\frac{8-x}{3} = 5-x$.

[3]

.....
.....
.....
.....
.....
.....

(b) Factorise $6a^2 - 8ab$.

[2]

.....

(c) Simplify $\frac{(3x-4)^6}{(3x-4)^3}$.

[1]

.....

Formula list – Higher tier

Area of a trapezium = $\frac{1}{2}(a+b)h$

Volume of a prism = area of cross section \times length

Volume of a sphere = $\frac{4}{3}\pi r^3$

Surface area of a sphere = $4\pi r^2$

Volume of a cone = $\frac{1}{3}\pi r^2 h$

Curved surface area of a cone = $\pi r l$

In any triangle ABC ,

Sine rule: $\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$

Cosine rule: $a^2 = b^2 + c^2 - 2bc \cos A$

Area of triangle = $\frac{1}{2}ab \sin C$

The Quadratic Equation

The solutions of $ax^2 + bx + c = 0$ where $a \neq 0$ are given by $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$

Annual Equivalent Rate (AER)

AER, as a decimal, is calculated using the formula $\left(1 + \frac{i}{n}\right)^n - 1$, where i is the nominal interest rate per annum as a decimal and n is the number of compounding periods per annum.

1. At lunchtime on any given day, Alun has one of the following drinks: coffee, tea, mineral water or fruit juice. His choice of drink each day is independent of his choice of drink on any other day. The table below shows the probabilities for three of his choices of drink on any randomly chosen day.

For use with question 2.

3. Are the following statements true or false? Circle the correct answer.
You must give a **full explanation** of your decision in each case.

(a) $a^2 + b^2$ is always an even number when a and b are whole numbers.

[1]

true / false

.....
.....
.....
.....

(b) $a^2 b^2$ is always an odd number when a and b are odd numbers.

[2]

true / false

.....
.....
.....
.....

5. Circle the correct answer for each of the following statements.

(a) The gradient of the line $2y = 4x + 3$ is

$\frac{1}{2}$

$\frac{3}{2}$

$\frac{2}{3}$

$\frac{3}{4}$

2

[1]

(b) The line $3y = 5x - 6$ crosses the y -axis at

$y = -2$

$y = -\frac{1}{2}$

$y = 2$

$y = \frac{5}{3}$

$y = \frac{1}{2}$

[1]

(c) The line $y = 3x - 2$ has a point with coordinates

$(3, -2)$

$(0, 2)$

$(-3, 2)$

$(2, 3)$

$(3, 7)$

[1]

6. Find, in standard form, the value of

(a) $\frac{2.7 \times 10^{10}}{6000}$,

[2]

.....
.....
.....
.....

(b) $(4.5 \times 10^{-2}) \times (3 \times 10^{-3})$.

[2]

.....
.....
.....
.....

7. For a particular visitor to Gwynedd, taking a trip up Snowdon is independent of visiting Caernarfon Castle.
The probability that the visitor takes a trip up Snowdon **and** visits Caernarfon Castle is 0.12.

(a) Complete the following tree diagram.

[4]

.....
.....

- (b) Calculate the probability that the visitor does not go up Snowdon and does not visit Caernarfon Castle.

[2]

.....
.....
.....
.....

8. (a) Solve the equation $\frac{8-x}{3} = 5-x$.

[3]

.....
.....
.....
.....
.....
.....

(b) Factorise $6a^2 - 8ab$.

[2]

.....

(c) Simplify $\frac{(3x-4)^6}{(3x-4)^3}$.

[1]

.....

9. On the graph paper below, draw the region that satisfies **all** of the following inequalities.

$$x \geq -1$$

$$x + 2y \leq 8$$

$$y \geq 2x + 1$$

Make sure that you clearly indicate the region that represents your answer.

[3]

.....

.....

.....

.....

.....

.....

11. A metal bar can be melted down to form 875 solid ornaments of height 6.3 cm. How many similar ornaments of height 31.5 cm could have been formed from the same metal bar?

[4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

12.

(a) Which one of the following numbers is rational? Circle your answer.

[1]

π $\sqrt{2}$ $\sqrt[3]{16}$ $\sqrt[3]{\frac{125}{8}}$ $\sqrt[4]{20}$

(b) Which one of the following numbers is irrational? Circle your answer.

[1]

$\left(\frac{3}{8}\right)^2$ $\sqrt{144}$ $\sqrt[3]{64}$ 0.79125 π^2

13. A breakfast cereal manufacturer decides to weigh samples of its products.

(a) The table below shows the weight of its samples of “Corn Chip” cereal.

Weight, x grams	Frequency	Frequency density
$480 < x \leq 490$	6	
$490 < x \leq 495$	22	
$495 < x \leq 497.5$	15	
$497.5 < x \leq 500$	17	
$500 < x \leq 510$	15	

Complete the frequency density column in the table and draw a histogram of this data.

[3]

.....

.....

.....

.....

.....

Frequency density

14. The graph of $y = x^2 + x - 1$ is shown below for values of x from -2 to 3 .

By drawing an appropriate straight line, use the graph to solve the equation $x^2 + 0.5x - 2 = 0$.

[3]

.....

.....

.....

.....

.....

.....

17. The diagram shows a sketch of $y = f(x)$.
On the same diagram, sketch the curves $y = f(x + 3)$ and $y = -f(x + 3)$.
Clearly label each curve with its function, and indicate the coordinate of any point where a curve crosses an axis.

The assessment will take into account the accuracy of your writing (linguistic and mathematical) in question **14**.

Formula list

Area of a trapezium = $\frac{1}{2}(a+b)h$

1. Aneurin and Branwen arranged a party after winning their event at the Urdd. Complete the four entries in the following table to show part of their bill for the food they bought.

Amount	Item	Cost
4 bags	Nuts @ £1.35 a bag	£5.40
7	Pizzas @ £1.75 per pizza
3	Chocolate cakes @ £ per cake	£7.47
..... cartons	Orange juice @ 99p per carton	£8.91
Total	

[4]

.....

.....

.....

2. Use a ruler and a pair of compasses to make an accurate drawing of this triangle.

[3]

The line AB has been drawn for you.

3.

Estimate the area of the shape drawn above on a square grid if the area of each square is 1 cm^2 .

[2]

.....

.....

.....

.....

.....

.....

Area of the shape = cm^2

4. (a) Circle the correct word to describe the chance of each of the following events happening.

(i) Mai has a box containing 100 different cards.
Each card has one number written on it from 1 to 100.
Mai chooses a card at random from the box.
The chance that the number on the chosen card is a 2-digit number is [1]

impossible unlikely even chance likely certain

(ii) Dafydd chooses a card at random from a box containing 50 cards.
There are 16 yellow cards in the box.
The chance that the chosen card is yellow is [1]

impossible unlikely even chance likely certain

(b) Write down the mode of these numbers.

4 5 4 7 8 4 5 9 3 [1]

.....

5. (a) Glyn has made a tower of bricks as shown below.
 Each brick has a number on it.
 For each pair of bricks that are next to each other in the same row, the number on the brick above them is the total of the numbers on the two bricks.

Glyn has already shown some of the numbers.
 Fill in all the other numbers on the bricks.

[3]

.....

.....

.....

.....

.....

- (b) Hari caught a bus into town.
 His bus fare was £2.85.
 He had only £1 coins with him.
 The bus company's rules state that no change can be given.

In order to avoid losing any money, what coins should Hari make sure he has with him the next time he catches this bus?
 Give the shortest possible list of coins.

[1]

.....

.....

.....

.....

(c) You will be assessed on the quality of your organisation and communication in this part of the question.

In a factory which makes 'ready meals', 2205 kg of potatoes are used every day.

There are 9 different types of these meals that are made and each of these uses the same weight of potatoes.

What weight of potatoes is used to make 4 of the types of meals that are made each day?

[3 + OC 1]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

6. Solve the following equations.

(a) $17 + x = 35$ [1]

.....

.....

(b) $8x = 480$ [1]

.....

.....

7. On the diagram, mark the point T with a cross so that

- $\hat{T}AB = 64^\circ$
- $AT = 7 \text{ cm}$.

[2]

8. (a) Circle either TRUE or FALSE for each statement given below.

[2]

STATEMENT		
A cuboid has 6 vertices.	TRUE	FALSE
A tetrahedron is a pyramid with 4 triangular faces only.	TRUE	FALSE
A cube has 12 equal edges.	TRUE	FALSE
A triangular prism has 3 rectangular faces.	TRUE	FALSE

(b) In the space below, draw **one** shape which has both

- rotational symmetry of order 3, **and**
- 3 lines of symmetry.

You must draw in the lines of symmetry.

[2]

9. Here are two sequences of numbers.
Some of the numbers have been left out of each sequence.
Fill in numbers to make correct sequences.
After each sequence, write down the rule used to find the next term in your sequence.

(a) 5,,, 14, [2]

.....
.....
.....

Rule

.....

(b) 40,,, 5, [2]

.....
.....
.....

Rule

.....

10. (a) Simplify the expression $9g - 5f - 2g + 3f$.

[2]

.....
.....

(b) Find the value of $3x + 4y$ when $x = -2$ and $y = 4$.

[2]

.....
.....

(c) Write down the next two numbers in the following sequence.

20 14 9 5 2

[2]

.....
.....

11. (a) Circle the correct answer for each of the following statements.

(i) Helen has bought one of the eighty tickets sold in a raffle. The probability that Helen wins the top prize in the raffle is

$\frac{1}{79}$

1%

1:80

$\frac{1}{80}$

80%

[1]

(i) One ball is selected at random from a box containing 5 blue balls, 4 red balls and 1 yellow ball. The probability that the selected ball is blue is

$\frac{5}{5}$

$\frac{1}{2}$

$\frac{5}{41}$

$\frac{10}{5}$

5%

[1]

(b) A bag contains some red, green and black beads.

One bead is selected at random from the bag.

The probability of selecting a green bead from the bag is $\frac{1}{3}$.

Which of the following sets of beads could have been in the bag?

Circle the correct answer.

2 red 1 green 1 black	3 red 6 green 3 black	3 red 3 green 4 black	7 red 4 green 1 black	5 red 3 green 4 black
-----------------------------	-----------------------------	-----------------------------	-----------------------------	-----------------------------

[1]

12. Calculate 38% of 15.6.

[2]

.....
.....
.....

13. The two shaded rectangles shown below are to be drawn on a white, square card of side length 9 cm. The two rectangles should not overlap.

Diagrams not drawn to scale

Show clearly how this can be done, and calculate the area of the square card that will be unshaded.

[4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

15. The diagram shows 2 identical parallelograms and the coordinates of four vertices. Find the coordinates of the vertices marked A , B and C .

[6]

Diagram not drawn to scale

.....

.....

.....

.....

A (..... ,) B (..... ,) C (..... ,)

16. Calculate the average speed of a car which travelled 80 miles in 2 hours and 30 minutes.

[3]

.....

.....

.....

.....

.....

.....

17. (a) Rotate the triangle 90° anticlockwise about the origin.

[2]

(b) Enlarge rectangle *A* using centre *C* and scale factor 2.

INTERMEDIATE TIER**

2nd SPECIMEN PAPER SUMMER 2017

1 HOUR 45 MINUTES

ADDITIONAL MATERIALS

A calculator will be required for this paper.
A ruler, protractor and a pair of compasses may be required.

INSTRUCTIONS TO CANDIDATES

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer **all** the questions in the spaces provided in this booklet.

Take π as 3.14 or use the π button on your calculator.

INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.

Unless stated, diagrams are not drawn to scale.

Scale drawing solutions will not be acceptable where you are asked to calculate.

The number of marks is given in brackets at the end of each question or part-question.

The assessment will take into account the quality of your linguistic and mathematical organisation, communication and accuracy in writing in question 5.

.....

.....

.....

9. (a) Rotate the triangle 90° anticlockwise about the origin.

[2]

(b) Enlarge rectangle A using centre C and scale factor 2.

[2]

(c)(i) Translate the triangle using the column vector $\begin{pmatrix} 5 \\ -2 \end{pmatrix}$.

[1]

(ii) Write down the column vector that will **reverse** the translation in part (i).

[1]

.....

.....

.....

10. Use a ruler and a pair of compasses to construct triangle ABC where $AC = 10.5$ cm, $\hat{A}CB = 60^\circ$ and $\hat{C}AB = 45^\circ$.
Line AC has been drawn for you.

[5]

11. Circle either TRUE or FALSE for each statement given below.

[2]

STATEMENT		
Circles with diameters of equal length are congruent.	TRUE	FALSE
Regular pentagons whose perimeters are of equal length are congruent.	TRUE	FALSE
Scalene triangles that have the same three angles are congruent.	TRUE	FALSE
Rectangles with equal areas are congruent.	TRUE	FALSE

- 13.** A total of 45 councillors make up the Planning, Finance and Education committees of a local council.
 Some of the councillors sit on two of these committees.
 No councillor sits on all three committees.

2 councillors sit on both the Planning Committee and the Education Committee.
 There are 18 councillors on the Education Committee.

(a) Complete the Venn diagram.

[3]

.....

.....

.....

.....

(b) How many councillors sit on both the Planning and Finance committees?

[1]

.....

(c) One of these 45 councillors is chosen at random.
 What is the probability that this councillor is on the Planning Committee?

[2]

Formula list – Higher tier

Area of a trapezium = $\frac{1}{2}(a+b)h$

Volume of a prism = area of cross section \times length

Volume of a sphere = $\frac{4}{3}\pi r^3$

Surface area of a sphere = $4\pi r^2$

Volume of a cone = $\frac{1}{3}\pi r^2 h$

Curved surface area of a cone = $\pi r l$

In any triangle ABC ,

Sine rule: $\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$

Cosine rule: $a^2 = b^2 + c^2 - 2bc \cos A$

Area of triangle = $\frac{1}{2}ab \sin C$

The Quadratic Equation

The solutions of $ax^2 + bx + c = 0$ where $a \neq 0$ are given by $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$

Annual Equivalent Rate (AER)

AER, as a decimal, is calculated using the formula $\left(1 + \frac{i}{n}\right)^n - 1$, where i is the nominal interest rate per annum as a decimal and n is the number of compounding periods per annum.

1. Use a ruler and a pair of compasses to construct triangle ABC where $AC = 10.5$ cm, $\hat{ACB} = 60^\circ$ and $\hat{CAB} = 45^\circ$.
Line AC has been drawn for you.

[5]
